The lighting options of the MX-4 full cassette awning

**markilux**  
The best under the sun

markilux

## Where there is shade, there is now **mx light**.

The new cassette awning markilux MX-4, conceived to shade large areas, is highly convincing with its avant-garde look and excellent markilux product design – both aesthetically beautiful and functional. The markilux MX-4 marries trend-setting design with advanced LED technology. During the day the MX-4 offers reliable and perfect solar shading. In the evening, it illuminates outdoor areas and creates a highly individual feel-good atmosphere.

The lighting options of the MX-4 are – literally – the highlight of this magnificent designer awning. The new highlight – **mx light**.

**mx light** stands for the multifarious and individual lighting options of the MX-4. Here you can find out more about **mx light** and choose one of the versions on show that takes your fancy. Using **mx light** warm white, - ambient or - ambient plus, you can illuminate your patio easily and appropriately to suit any desired mood.

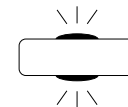

The **LED Line** in the cassette accentuates the design of the awning and creates a fascinating atmosphere.

The **spots attached** to the front profile highlight specific areas selectively and charmingly.

The **built-in spots** in the cassette are fitted with light sources that emit light from one or both surfaces. Conditions which are ideal for the creation of an all-inclusive lighting concept.

The **wall lights** – perfectly matched to the design of the awning – are fitted with light sources that emit light from one or both surfaces.
