## Product Characteristics

### Description

- exterior awning for conservatories, glass canopies and large skylights

### Special features

- fully encompassing cassette that protects the cover perfectly
- the awning cover is bonded with stabilising vertical panel joints – in the case of the series sunvas, sunsilk, sunbow and perla FR the standard panel width is 60 cm (perfortex 120 cm / Soltis Perform 92 88,5 cm / transolair 84 cm) – in order to achieve the optimum overall cover tension and stability
- tracfix optional: the continuous lateral cover guidance system that leaves no gap between the cover and guide tracks – gives improved wind stability and a cleaner appearance
- option of a silentec motor – motor noise is appreciably reduced
- tried-and-tested tensioning system with drive belts and integrated gas pistons – delivers optimum cover tension – in any phase of extension
- the broad range of brackets with patented clip-on system offers individual fixture solutions
- can be combined with vertical cassette markilux 776 / 620 tracfix / 625 tracfix

### Dimensions

- single unit: 60–700 cm in width, maximum extension 700 cm (depending on the width)
