Cassette awning

# Semina Life

## Semina Life LED | Valance Plus | LED Valance Plus

**Semina Life** is the all-rounder among cassette-awnings. It impresses due to its modern, fresh design combined with weinor's technology tried and tested over many years. As it is such superb value for money the **Semina Life** is a real alternative to the semi-cassette. Its many technical highlights provide superb comfort and a long operating life. Whether young or old, modern or traditional: **Semina Life** is always just the right choice – in a class of its own!

### UPDATE june 2022

**Modern design covers:**

The stainless steel look headplate rings and drop profile endcaps can be combined with the required frame colour

**Integrated rain gutter:**  
Water drain

**Stable, elegant brackets:**

With easy access to adjust the inclination

Wall  
mounting

Ceiling  
mounting

Rafter mounting

**Semina Life LED (optional):**  
Integrated lighting

# Semina Life Highlights

01

## **Valance Plus option:**

Vertical privacy and sun protection

Both the awning and Valance Plus are available either with gear drive or motor drive.

## **weinor LongLife arm:**

Very durable and low-noise

# Semina Life Benefits

## Cassette-awning – youthful design with state-of-the-art technology

The Semina Life cassette is chic and offers protection against the weather.

- Innovative closing of the awning causing practically no wear at all thanks to the cushioned infeed rollers
- Beautifully shaped stainless steel look aluminium headplate rings and drop profile endcaps

## Semina Life LED – cassette with integrated LED lighting

The LED spotlights integrated into the cassette produce atmospheric lighting on the patio.

- 30,000 LED light hours with lowest energy consumption (85% electricity saving compared to halogen technology)
- Dimmable when used with BiConnect or Somfy io-homecontrol® radio control

## Valance Plus – vertical privacy and sun protection

The Valance Plus is elegantly integrated into the awning's drop profile. It provides privacy and glare protection even with a low-lying sun.

- Continuously extendable up to 210 cm
- Patented weinor OptiFlow-System® to keep fabric ideally positioned and to close the drop profile safely

## Two-part bracket cover – simple angle of pitch adjustment

The lower part of the beautifully shaped cover can be easily removed. As a result there is very easy access to the screws for the angle of pitch adjustment. The pitch in the brackets is preset at the factory for easy installation.

# Semina Life LED

## LED lighting – 30,000 hours of lighting with lowest energy consumption

Select LED components for top weinor quality:

- Atmospheric light thanks to special glass lenses
- Visually integrated into the cassette
- Lighting remains on even when awning is retracted
- Highly energy-efficient
- Operating life of 30,000 hours
- Dimmable when used with BiConnect or Somfy io-homecontrol® radio control
- Easy to service: simply replace individual LED lights without dismantling the awning

### Integrated LED lighting

# Semina Life Valance Plus

## More privacy thanks to vertical privacy and sun screen (optional)

The gear-operated or motorised vertical awning is elegantly integrated into the awning's front profile.

- Glare protection and privacy shield up to a maximum valance height of 210 cm
- Extends to any length
- Use Valance Plus with an awning angle of pitch between 10° and 20°
- Valance Plus cannot be retrofitted
- Valance Plus with motor only with motorised awning

### Maximum awning size for Valance Plus

Closed

### V-shaped waves

On wider units and units which are mounted with special facades technology (distance tube, spreader plates, into insulated walls) symmetric v-shaped waves can occur from the sides. Reason for this, are the weight and structure on the fabric and the bending of the roller tube, which are transferring additional load onto the main brackets and the special fixings.

### Available fabrics for the Valance Plus

Q Transverse seam: fabric with transverse seam; either in top or bottom third as desired; structure of fabric runs diagonally to structure of awning fabric

L Longitudinal seam: structure of fabric runs longitudinally to structure of awning fabric

– Not available

\* Max. roll widths are stipulated in the collection brochure

\*\* The following designs are not available for Valance Plus: 6-334, 6-335, 6-390, 6-397, 6-400, 6-403, 6-409, 6-410, 6-415

Please note: On the gear-driven Valance Plus, it is possible that the Valance Plus bottom rail will close unevenly.

# Semina Life Controls

**The receiver, power supply pack and other electrical components, such as the BiConnect receiver are integrated into the cassette**

The transformer box can be easily be opened for servicing purposes.

The receiver, which is separate from the drive, is then easily accessible.

## Exclusive retraction protection

- Co-ordinated retraction: first the Valance Plus, then the awning
- To make sure nothing gets knocked over on the terrace

#### Note:

Please see the "Accessories" technical brochure for further details regarding the drive and control.

Some options are subject to a surcharge. For prices, please refer to the weinor awnings price list.

## Gear drive (optional)

The Semina Life can of course be extended and retracted using a gear handle too (with a max. projection of 350 cm). This option is recommended whenever it is hard to connect to an electrical power source on the site or if the awning is not frequently used.

- The Semina Life has a universal bevel gear system.
- End stop adjustable from outside
- Tested according to DIN EN 14203
- Freewheel device when extended

Gear drive installation options based on the awning's type of installation

Standard gear outlet with wall mounting

Gear drive installation options based on the awning's type of installation

Gear outlet with ceiling/balcony installation

## Tempura heating system (optional)

**The perfect combination: Semina Life with Tempura heating system, Valance Plus and BiConnect\*:**

- Automated retraction with BiConnect: first the Valance Plus, then the awning
- As a result, the Valance Plus is protected from the material being damaged due to overheating by the Tempura heating system

### Please note:

The Tempura's angle of pitch is restricted to 15° as standard. (This restriction is to avoid the wall being heated up too much by the Tempura.) The grub screw, which restricts the angle of pitch, can be removed if the Semina Life is adjusted up to 10° at the most. Then it is possible to adjust the Tempura's angle of pitch up to 30°.

- \* The heating may not be attached to awnings with Valance Plus. Unless a control is used which ensures that the awning is always extended first and then the Valance Plus and that the Valance Plus is always retracted first before the awning. In this way safety clearances are always adhered to.

# Semina Life Roller support

Semina Life: wall mounting with centre bracket and roller support

- ① Centre bracket (wall bracket)
- ② Cassette
- ③ Fabric roller bearing
- ④ Fabric rolls
- ⑤ Roller support
- ⑥ Sliding support bearing

## Notes:

- From a width of 551 cm or more, a roller support and centre bracket is used in the middle
- The sliding support bearing is preassembled and can be adjusted to the size of the fabric roll accordingly
- Support of load against the wall or roof by means of simple screw fastening
- For widths of 551 cm or more you must use the centre bracket provided. This has a slightly different adjustment mechanism to the standard wall bracket. For widths below 551 cm we generally recommend not using a centre bracket unless you feel it is absolutely necessary, as the standard wall brackets are sufficient to securely mount the awning.

Semina Life centre bracket: wall mounting (rear view)

Semina Life centre bracket: roof mounting (rear view)

Semina Life centre bracket: rafter mounting with rafter bracket (rear view)

# Semina Life Planning

## Site measurements – determining the projection and head clearance height

- Find the projection by looking in the “Projection” table for the terrace depth.
- Using the projection from the table and the required angle of inclination, consult the “head clearance height” table for the head clearance height. This head clearance height refers to an installation height of 300 cm.
- Add/subtract the difference between 300 cm and the actual installation height to/from the head clearance height in the table.

### Determining the projection

Angle of pitch	Terrace depth in cm					
	150	200	250	300	350	400
5°	160	210	260	310	360	400
15°	160	210	260	320	370	400
25°	170	230	280	340	390	400

Projection in cm (rounded figures)

This table can be used to find the awning projection for any given horizontal patio depth.

### Determining the head clearance height

Angle of pitch	Projection in cm					
	150	200	250	300	350	400
5°	276	272	267	263	258	254
15°	250	237	224	211	198	185
25°	226	204	183	162	141	120

Head clearance height in cm (rounded figures)

This table is used to find the head clearance heights for various projections when the angle of inclination is 5°, 15° or 25°.

This table is based on the example of an installation height of 300 cm (upper edge of awning).

## Wall bracket

### Sizes and bracket recommendations

#### Wall mounting on pressure-resistant surface

Minimum number of required wall brackets so that the function of the awning is ensured, regardless of the mounting surface. Selection of the brackets using the weinor bracket overview and using the maximum extraction forces of the fixings used!

Width in cm	Diagonal in 10 cm steps					
	up to 150	160-200	210-250	260-300	310-350	360-400
up to 200	2					
201-250	2	2				
251-300	2	2	2			
301-350	2	2	2	2		
351-400	2	2	2	2	2	
401-450	2	2	2	2	2	2
451-500	2	2	2	2	2	2
501-550	2	2	2	2	2	2
551-600	2+1	2+1	2+1	2+1	2+1	2+1
601-650	2+1	2+1	2+1	2+1	2+1	2+1

- 2 2 x wall bracket 250 mm
- 2+1 3 x wall bracket 250 mm + 1 x centre bracket 250 mm

**Use of central bracket dependent on:**  
Width  $\geq$  551 cm

**Observe size limits; unit must have X more width than projection:**

- 250 mm wall bracket: X = 42 cm
- 430 mm wall bracket: X = 60 cm

### Position of wall brackets and Semina Life cassette

#### Update

### Minimum spacing distances for installation in the niche (wall mounting)

## Cross-sections

### Semina Life LED

- ① Wall bracket

Semina Life 500 x 300 cm\* as an example.

Mounting plate for wall mounting  
660 x 390 x 15 mm

Position of the mounting plates using the  
Semina Life 500 x 300 cm\* as an example.

\* Depending on the width of the awning,  
the positioning of the mounting plates  
may vary.

## Wall mounting – mounting plates

Roof front plate for wall mounting  
540 x 220 x 15 mm

### Note for front ceiling mounting:

The indicated extraction forces apply to a storey ceiling with a thickness of at least 160 mm. Here, the fixings are installed exactly in the centre of the storey ceiling, so that there is a minimum upward and downward edge distance of 80 mm. For this mounting type, a lining, e.g. with 150 x 50 mm rectangular pipes, is required. Here, the lower edge of the rectangular pipe must be flush with the lower edge of the storey ceiling.

Mounting plate for centre bracket

Rafter bracket with mounting plate for rafters (right)  
weinor recommends using mounting plates for rafter brackets

Adaptor plate for rafter bracket  
260 x 190 x 15 mm

## Extraction forces

The extraction force is the force with which the awning weight and the wind load pull on each upper and/or front fixing. The tables indicate this force in N per upper fixing. It varies depending on the awning size and the wall bracket / mounting plate used.

### Selecting the wall bracket and anchoring system:

1. Consult relevant table for extraction force per fixing for selected awning size.
2. Select a wall bracket / mounting plate for which there is fixing material which can resist the indicated extraction force. Remember to take into account the spacing, the area which will be damaged if the fixing breaks out, the type of fixing material used and the mounting base.

Use the separate bracket overview for an exact planning of the awning attachment.

### Extraction force in N per upper fixing for wall mounting

Brackets **without** mounting plates

**Wall mounting** with up to 200 mm facing (non-pressure-resistant surface)

Please observe the width to projection dimension limits

For the extraction forces of the valance plus version, please refer to the console overview!

1 x wall bracket 250 mm  
Number of fixings: 8

1 x wall bracket 430 mm  
Number of fixings: 12

**Please note:**  
from a width of 551 cm additional  
1 x centre bracket 250 mm  
is required.

## Extraction forces

### Extraction force in N per upper fixing for wall mounting

Brackets **with** mounting plates

**Wall mounting** with up to 200 mm facing (non-pressure-resistant surface)

Please observe the width to projection dimension limits

For the extraction forces of the valance plus version, please refer to the console overview!

1 x mounting plate  
660 x 220 x 15 mm incl.  
1 x wall bracket 250 mm  
Number of fixings: 12

1 x mounting plate  
660 x 390 x 15 mm incl.  
1 x wall bracket 250 mm  
Number of fixings: 12

1 x roof front plate  
540 x 220 x 15 mm incl.  
1 x wall bracket 250 mm  
Number of fixings: 8

#### Please note:

from a width of 551 cm additional  
1 x wall bracket 250 mm incl.  
1 x mounting plate 370 x 220 x 15 mm  
as centre bracket is required.  
This means an additional 4 fixings will be  
required,  
for roof front plate mounting at 2.

## Extraction forces / Shear forces

### Extraction force in N per front fixing for ceiling mounting

Please observe the width to projection dimension limits

For the extraction forces of the valance plus version, please refer to the console overview!

- ☐ 1 x ceiling angle incl.  
1 x wall bracket 250 mm  
Number of fixings: 8

**Please note:**  
from a width of 551 cm additional  
1 x ceiling angle incl.  
1 x wall bracket 250 mm  
as centre bracket is required.  
This means an additional 4 fixings will be required.

F = force

### Shear forces in N per fixing for rafter mounting

Please observe the width to projection dimension limits

For the extraction forces of the valance plus version, please refer to the console overview!

- ☐ 1 x rafter bracket with  
1 x adapter plate for rafter bracket incl.  
1 x wall bracket 250 mm,  
one left, one right for each

- ☒ 1 x rafter bracket with  
1 x mounting plate for rafter with  
1 x adapter plate for rafter bracket incl.  
1 x wall bracket 150 mm,  
one left, one right for each

**Please note:**  
from a width of 551 cm additional  
1 x rafter bracket with  
1 x adapter plate for rafter bracket incl.  
1 x centre bracket 250 mm,  
one left, one right for each,  
as centre bracket is required.

Width in cm	Projection in cm					
	150	200	250	300	350	400

300	2068	2975	4087			
	934	1304	1757			
350	2330	3358	4611	6152		
	1047	1466	1976	2604		
400	2593	3740	5134	6838	8612	
	1160	1627	2195	2889	3609	
450	2855	4123	5658	7523	9479	13360
	1274	1789	2414	3173	3968	5542
500	3117	4505	6181	8208	11636	14602
	1387	1951	2633	3458	4847	6052
550	3380	4888	6705	8893	12636	15843
	1500	2113	2852	3742	5259	6562
600	3581	5207	7163	10675	13566	17011
	1552	2212	3005	4429	5601	6997
650	3840	5586	7682	11456	14563	18248
	1661	2370	3220	4750	6008	7503

In the case of rafter mounting, the fixings are included in the order.

**weinor recommends the use of rafter brackets with mounting plate!**
