

Terrazza Pure

The cubic glass patio roof

NOW CUBIC

Honoured with:

weinor

Awnings Patio roofs Glasoasen®

CLEAN

LINES

Spectacular design – sophisticated technology: behind the modern cubic style of roof on the Terrazza Pure there is an extremely innovative design.

Standard patio roofs are designed angled so that rainwater can drain off. But not the Terrazza Pure! Here the pitch is integrated into the frame construction and is therefore invisible from the outside. The result: a clear, cubic design combined with reliable drainage. Terrazza Pure is the perfect solution for anyone who wants to enjoy lots of natural light on their patio and appreciates reliable, modern designed weather protection at the same time.

PURE INNOVATION

The new rectangular construction is the result of weinor's unique glass support system.

ENJOY LIFE AL FRESCO

Enjoy your patio from the first day of spring until well into autumn: weinor's Terrazza Pure patio roof will keep you well sheltered from the wind and other elements. And your patio furniture can remain outside without being damaged.

PURE

AMBIENCE

Design your patio to suit your personal taste!

For the space on your patio to become your own personal feel-good spot, doesn't just require sophisticated design but also an atmospheric mood. Terrazza Pure offers both. The cubic elegance is complemented perfectly by high-quality decorative strips and the unique lighting concept for posts and roof supports.

EXCLUSIVE DECORATIVE STRIPS

With the 5 decorative strips (silver aluminium, copper aluminium, brown aluminium, brass aluminium and anthracite aluminium) you can break totally new ground with your patio design. The anodised aluminium material gives your Terrazza Pure an elegant look.

The decorative strips can be integrated:

- Across the entire length of the posts' outsides
- On the underside of the centre roof support
- Sideways on the outer roof supports

ATMOSPHERE

LIGHT

PLAY WITH COLOURS

Are you more in the mood for green today or rather blue? With the high-quality LED strips you are guaranteed to set the right tone. Your light is distributed evenly resulting in an incomparable atmosphere. Choose from **48 colours and 3 shades of white!**

NUMEROUS LIGHT OPTIONS

Plan your own lighting concept! Where would you like to fit the coloured LED strips? To the roof supports or rather the posts? Or even both? No problem! weinor has a variety of options so you can **immerse your patio in the right** light.

You can choose where to create the coloured light accents:

- On the outside of the upper or lower posts
- On the underside of the roof support, e.g alternating with the decorative strips of your choice too.

The integrated LED lighting can be conveniently controlled and dimmed using the **weinor BiConnect radio control**, the colours can be set at the press of a button.

LED lighting in upper post

LED lighting in lower post

A HIGH-QUALITY LOOK

You can create a patio to suit your personal taste using the weinor decorative strips. The Terrazza Pure posts and roof supports can be designed with these.

LIGHT IS LIFE

Present your patio to look spectacular! Whether it's colourful or white light – you create effective accents on your patio with the high-quality coloured LED strips integrated into the posts and roof supports.

STAY OUTDOORS

White snow is **BEAUTIFUL AND SAFE** on the Terrazza Pure glass roof. The construction can be designed for extremely high snow loads.

Enjoy the al fresco life – even when it gets cooler! With the w17 easy full glass sliding door you transform your Terrazza Pure into a weinor Glasoase®.

You don't have to retreat into the house as the days get colder quite yet. Simply fit the frameless w17 easy full glass sliding door from weinor to your Terrazza Pure, later on too. As a result, you can enjoy your patio protected from the wind and other elements on sunny winter days too – with an unobstructed view of nature.* It's even cosier in the weinor Glasoase® with the Tempura heating system.

* The weinor Glasoase® is a cold conservatory system that protects the patio from the wind and rain but is not another living room.

PRIVACY AND GLARE PROTECTION

The VertiTex II vertical awning can be used for the best possible privacy, glare and sun protection all the way round the Terrazza Pure.

Would you like to be protected from prying eyes and dazzling light from the sides and front? Then the VertiTex II vertical awning from weinor is the right choice. **The extremely small cassette** blends in unobtrusively with the look of the patio roof and house facade. The patented weinor **Opti-Flow-System®** also ensures perfect fabric positioning. The vertical awning even runs reliably and quietly with high winds – thanks to the three guide versions zip, rail and rope.

The weinor my collections and screens by weinor® fabric collections have the right awning pattern to suit every taste and any application.

Contemporary shading

The **Sottezza II conservatory awning** promises a pleasant climate on your patio. The decorative sun protection is elegant, sleek, understated and easy to clean. As the Sottezza II is fitted under the patio roof. This protects it from moisture and dirt leaving the fabric attractive and clean.

Light and air permeable

The **“screens by weinor®” collection** specially developed for the VertiTex II includes a large selection of attractive and high-quality fabrics. Different degrees of transparency and of how much air is let through are possible, depending on requirements.

QUALITY & COMFORT

Clever construction

The roof support design is totally unique. **A newly developed glass support system** guarantees reliable drainage. At the same time, this allows for the cubic design to be produced without any angled roof supports. As a result, an appropriate head clearance height is even guaranteed with lower roof connection heights due to the design.

The roof supports are also proven to be designed so stably and watertight that no water can get under the roof at the transition.

an original product

High-quality and long-lasting

Terrazza Pure from weinor impresses due to its **statically tested and durable aluminium construction**. A complete coating of high-quality paint even offers the profile edges and stainless steel screws the very best protection against corrosion and the weather.

The latest frame colours

At weinor you can select from **more than 50 standard colours and over 150 other RAL colours**. The powder coating done in our in-house factory guarantees colour fastness and a uniform gloss level.

Terrazza Pure technical data

Max. roof width	7 m
Max. roof depth	4 m
Max. clearance height/ bottom edge of gutter	2.60 m (or 2.90 m)
Snow load	75 kg to 550 kg per m ²

Pleasant warmth

The compact **Tempura Quadra heating system** subtly blends into any architectural style. The warming infrared rays can be felt as soon as the system is switched on. A high degree of 91% efficiency is achieved due to the concentrated radiation thanks to strong reflectors.

Only from weinor: Operate everything conveniently with just **one hand transmitter** – awnings, lighting, heating!

Alternatively, you can also operate every technical element on your patio using io-homecontrol® from **somfy***.

Convenient control

All the electrically operated components, such as LED strips, the heating system and conservatory or vertical awnings can be conveniently operated **with just one hand transmitter** using the **BiConnect radio control** from weinor. The lighting and Tempura heating system are therefore virtually continuously dimmable. It's even possible to control them by iPhone and iPad using the BiEasy app.

* With io-homecontrol® from Somfy dimming and color change with LED strips is not possible.
